DETAILED ACTION

1. In view of the appeal brief filed on 3/29/2004, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

2. Applicant's arguments, see Appeal Brief, filed 3/29/2004, with respect to the rejection(s) of claim(s) 1-8 under USC 112 and 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kwalwasser (5,857,854). Kwalwasser discloses a gas powered gun (see Figure 1) having means

for simulating a recoil (see abstract lines 1-5), that is enhanced to the same level of recoil that is generated by a gun firing a powder-propelled projectile (inherent).

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Muchle et al (5,947,738). Muchle et al discloses a gas powered gun having means to simulate a recoil that is enhanced to substantially the same level of recoil that is generated by a gun firing a powder propelled projectile. (see Col. 4, lines 50-57).

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by W. Trammell (2,023,497). Trammell discloses a gas powered gun comprising means for simulating a recoil that is enhanced to substantially the same level of recoil that is generated by a gun firing a powder propelled projectile. (see Col. 2, lines 37-40)

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Zerega (4,829,877). Zerega discloses a gas powered gun comprising means for simulating a recoil that is enhanced to substantially the same level of recoil that is generated by a gun firing a powder propelled projectile. (Gun is powered by gas escaping from vent #42 which operates the reloading device, and simulates the recoil of a revolver, or automatic weapon; see Col. 4, lines 6-12)

8. Claim 1 is rejected under 35 U.S.C. 102(B) as being anticipated by Tratsch (2,708,319). Tratsch discloses a gas powered gun comprising means for simulating a

recoil that is enhanced to substantially the same level of recoil that is generated by a gun firing a powder propelled projectile. (see Figures 1-3)

Allowable Subject Matter

9. Claims 9-32 are allowed.
10. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
